SUMMARY

Backend Java Developer with 2+ years building Spring Boot microservices for large-scale government platforms. Focused on **database performance**, **application security** and reliable Kafka/gRPC integrations, owning features from schema design to production debugging on Kubernetes.

EXPERIENCE

Backend Java Developer — GTEL OTS

Sep 2024 – Present

Public-safety command & user-management platform

Nov 2024 – Present

- Cut organisation-tree user loading from **~120s to ~0.4s** through execution-plan analysis and indexing.
- Helped re-platform a live .NET system to Spring Boot microservices, migrating **1M+ records** with live sync.
- Built multi-level RBAC with granular permissions and organisation-level row data scoping.
- Designed a gRPC-to-Kafka incident-event pipeline; built the incident lifecycle and GPS-based dispatch.

Enterprise notification & communication platform

Jan 2026 – Present

- Built OTP login with AES-GCM encrypted codes, lockout, resend throttling, PII masking and SSO.
- Built backup/restore across Oracle, Elasticsearch and MinIO with Kafka fan-out and a TTL-bound Redis lock.
- Replaced full CLOB scans in Vietnamese keyword search with dedicated search columns.
- Maintained gRPC/Feign contracts for 10+ services; authored 120+ Flyway migrations and JUnit 5/Spock tests.

Smart-camera traffic enforcement platform

Sep 2024 – Feb 2025

- Built penalty-notice, plate-enquiry and fine-payment services on records from a ~2,000-camera AI network.
- Moved vehicle and licence lookups behind a reusable Spring AOP aspect; fixed Kafka/gRPC ingestion issues.
- Fixed React/TypeScript UI defects in layout, typography and sizing.

Desktop App Developer Intern — IO STREAM

Oct 2023 – Jan 2024

- Built Windows desktop apps with C# and WinUI: file security tools and media downloaders.

SKILLS

Java & Spring	Java 17/21, Spring Boot 3.x, Spring Data JPA, Spring Security, Spring AOP, Hibernate
Data & Storage	Oracle (execution plans, indexing, query tuning), PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Flyway
Security	JWT, OAuth2/SSO, OTP, AES-GCM, RBAC, PII masking
Messaging & APIs	Kafka, gRPC, REST, OpenFeign
DevOps	Docker, Kubernetes, OpenShift, Rancher, GitLab CI/CD, Git, Maven, Gradle
Testing	JUnit 5, AssertJ, Spock
Other	React/TypeScript (UI fixes), Go and Vue 3 (personal projects), C#

EDUCATION

B.Eng. Information Technology — HCMC Open University

Sep 2021 – Sep 2025

Grade: Good · Academic Excellence Scholarship (HBKKHT), Jan 2025

LANGUAGES

Vietnamese (native) · English (working proficiency)
